<i>Secretary</i>	- - - - -	EDWARD LAFFERTY
<i>Treasurer</i>	- - - - -	ROBERT SCHMIDT

THE Star and Atom Society, the honorary science club of Springfield High School, has completed its second successful year. The society has come into the enviable position of being the most flourishing club in the school. Its membership is greater than any other club and it is still embellished by the famous cognomen of "Aristocracy of Brains."

The purpose of the society is to encourage discussions and study of scientific topics. Biological Evolution, Vaccination, the Moon, Relativity, November Constellations, and the Eclipse of the Sun were some of the subjects presented. The question of whether Mars is inhabited was also discussed.

The membership of the club is limited to members of either Chemistry or Physics classes. The scholarship ranking required for admittance is ninety per cent in the

scientific subject and at least eighty per cent in all other subjects.

Interest in the club has been very great and attendance has been very high. The members have been edified and instructed in many fields and their curiosity and interest in such subjects has been multiplied.

The usual program consists of a main paper given by one member, with a leading discussion by another member, after which the meeting is thrown open for a free discussion by all members.

The club has been a great success both in the accomplishment of its aims and in growth of numbers. The club, since it is organized solely on a scholarship basis and for educational purposes, has had a beneficial influence on the school.

The success of the club has been largely due to the supervision and advise of the faculty advisors, Mr. Conover, Mr. Stevens, Mr. Eckert, and Mr. Fox.
